

New: Retrofit for Peco GoldXtream Filter Element

Introducing Pall's 'direct replacement' filter technology for users of Peco GoldXtream filters in:

- *Gas Processing (Amine and glycol regeneration loops)*
- *Gas Production (Produced water)*
- *Hydrocarbon Refining (Liquid feedstocks; product polishing; amine regeneration; water wash)*
- *Water and Wastewater (Raw water feeds; Wastewater disposal and release)*

Pall's new retrofit products allow users of other manufacturers' elements to benefit from Pall technology without the need to replace the existing housing/vessel. Pall retrofit products are direct replacements for existing elements, offering the performance and value you have come to expect from Pall.

Advantages of Pall Technology

Pall's filter media and element designs bring together industry leading technologies and advanced manufacturing processes to deliver unsurpassed performance and value in each and every element.

Pall Retrofit p/n:

- **PFTM5740V266** (5µm); **PFTM3740V266** (3µm)

Replaces: Peco p/n: **PHD-639 05LV**

- High void volume for high dirt-holding capacity
- Broad range of chemical compatibility for maximum application utility

Specifications:

- Maximum Operating Differential Pressure: 3.4 bard (50 psid) @ 79°C (175°F)
- Materials of construction
 - Polypropylene media, support and endcaps
 - Tin coated steel center core

Global Presence – Local Support

Pall is a global company with offices in Asia, Americas, Europe, and the Middle East. This global presence gives us the ability to provide local commercial or technical support whenever or wherever there is a customer need.
