

European WEEE Regulation 2012/19/EU

Collection and Recycling Arrangements in Germany

Under the German ElektroG Act, Pall provides arrangements for the collection, treatment, recycling and recovery of any electric and electronic equipment bought new from Pall, when at the end of its life that equipment finally becomes waste. Waste electrical or electronic equipment of this type is referred to as WEEE.

Pall drives for very competitive pricing on all our products. Therefore, when these WEEE requirements were introduced, instead of increasing the prices of our products, Pall decided to share these environmental costs with our customers. Because Pall believes in being transparent with you, please be aware that our approach to these environmental costs is:

- Pall pays for the costs of treatment, recycling and recovery of the WEEE to meet the requirements set by the WEEE legislation.
- Pall pays for the costs of data management and reporting to the relevant country specific Agency, to demonstrate compliance with all administrative requirements of the WEEE legislation.
- The user pays for transportation of their WEEE to Pall's appointed recycler in Germany.

Pall has a recycling contract with a European Advanced Recycling Network (EARN) recycler in Germany and will cover any costs of treatment, recycling and recovery of the equipment on arrival at the designated recycling facility in Germany. WEEE that arises from the purchase of Pall devices is classed as non-hazardous waste based on the materials of construction employed by Pall in its manufacture – unless otherwise indicated on the product label. However, if as the result of use the equipment has been contaminated with a “hazardous” substance, please dispose of the equipment in line with the hazard present.

As indicated, it is your responsibility to arrange and pay for the costs of collection and transportation to the recycling facility.

Under German waste management regulations, end users are free to use any carrier to collect and transport WEEE to the EARN recycler.

For larger quantities of waste, you may wish to contact the recycler directly in order to arrange and pay for an alternative collection method. The Pall recycler in Germany is:

EARN Partner

Electrocycling GmbH

Landstraße, 91

38644 Goslar

Germany

Tel: +49 (0) 5321 3367-23

www.electrocycling.de

There is no legal requirement that WEEE be accompanied by documentation when transported in Germany. However, in order for our recycler to identify Pall equipment upon arrival at their address, please download the recycling label, complete the label with your company details and attach it to a suitable box for transport to the recycler:

Pall thank you for your participation in this key recycling endeavour.
